

Unlock the potential of your Future Leaders

➔ Discover how you can utilize Symbol's Young Professionals Program

Discover a world of opportunity for your organization with our Young Professional Program. The YPP is designed to shape and empower young talent within your company, equipping them with the skills and mindset necessary to drive success and achieve excellence with the support and guidance of Symbol's Lead consultants.

At Symbol we adhere to our values, to inspire and improve. Furthermore, we are dedicated to driving excellence and continuous improvement. Investing in young talent is part of our mantra. We are thrilled to show the world our successful Young Professional Program where we shape the future leaders of the world. This flyer is your gateway to understanding the remarkable benefits and value our program offers to both young professionals and forward-thinking companies like yours.

What is the added value of the Young Professional (YP)?

- ➔ Our YPs are young, talented, well educated and bold, the perfect recipe for a new breath of fresh air.
- ➔ Our YPs are mentored by an experienced and involved Lead Consultant. They are an integral part of the Symbol Network, and thus offer valuable networking opportunities.
- ➔ The Young Professional Program is tailored towards reducing lead time, improving quality systems, problem solving (8D), setting up of business processes (ISO), MSA studies, FMEA structure or setting up work instructions. All our YPs have at least a Green Belt certification.
- ➔ Our YPs have demonstrated their adaptability and ability to learn quickly. They are well-versed in working in diverse industries and environments, making them highly flexible and capable of quickly understanding new business processes.

What do we ask of the organization?

Our Young Professionals take charge, know how to get things done, are independent and have guts. They are also responsible, analytical, results-oriented and communicatively strong. To make our Young Professional's time with your organization as valuable as possible, we also ask something of you. To start with: openness, a fresh outlook and the will to take your organization to the next level. We also ask you to facilitate the Young Professional by giving him or her knowledge of the organization and processes.

With our fresh perspectives, innovative ideas, and passion for excellence, we partnered with **Tecnotion** to revolutionize their training processes. We standardized training practices and fostered a positive work environment.

Our young professionals played a crucial role in this transformation, seamlessly collaborating with the existing workforce and bringing a dynamic energy to the project. By leveraging our digital fluency and quick grasp of concepts, we accelerated the adoption of TWI and propelled Tecnotion toward success.

Through fresh perspective and innovative thinking, our young professional quickly became an invaluable asset to **Mogema**.

His ability to adapt to complex tasks, collaborate effectively, and think outside the box propelled the company towards newfound success. Operational efficiency improved, quality soared, and customer satisfaction reached new heights. The dedication and determination of our YP and Symbol Team, paved the way for Mogema's continued growth and success.
